

Tsunami Compressed Air Solutions

Superior Filtration Products

AIR DRYERS

Regenerative and Membrane style dryers available from 15-600 cfm. Systems can remove humidity down to .01 RH and achieve dew points down -80F°.

- Regenerative Dryers
- Membrane Dryers
- Custom Configured Systems

POINT OF USE SOLUTIONS

Filters from 20-240 cfm remove water, oil and oil vapors at point of use applications.

- Water Separator
- Oil Coalescing Filters
- Activated Carbon Filters
- FRL's

FILTRATION PACKAGES

Systems from 20-120 cfm protect air lines to critical equipment.

- Plasma Cutters
- Lasers
- Precision Equipment

DRAINS

A complete line of drains available in standalone or filter mounted options.

- Pneumatic Drains
- Electronic Drains

AIR TOOLS & ACCESSORIES

Energy efficient solutions for industrial compressed air needs.

- Air Monitoring Equipment
- Couplers
- Plugs
- Blow Guns

UTILITY STATION

20 amp industrial GFI protected outlets equipped with two lubricated and one non-lubricated air service connections.

- Hooks to hang and organize cords and hoses.

A NEW LEADER IS ON THE RISE

At Tsunami Compressed Air Solutions our passion is to design & develop innovation products that set the industry standard for reliability and performance.

We are committed to reducing wasted air consumption by engineering energy efficient solutions using the latest technology to provide the cleanest, driest compressed air available. Our products are manufactured at our brand new 50,000 sq ft state-of-the-art facility located in Monticello, Minnesota.

Our patented technology, combined with top-notch customer service and competitive pricing have made Tsunami a leading provider of clean air filtration and drying equipment.
