

# WATER SEPARATORS, OIL COALESCING FILTERS & ACTIVATED CARBON FILTERS

For the unexpected surges ordinary filters cannot handle, Tsunami offers maximum protection to accommodate any application. What separates Tsunami from other manufacturers is that our filters are machined from 6061 aluminum and are anodized for maximum corrosion resistance, inside and out. This prevents rust and other corrosion from forming inside the filter housings unlike filters manufactured out of die cast materials. Tsunami filtration systems are available in up to three stage packages include water separators, oil coalescing filters and activated carbon filters.

## Specifications

- 1 Water separator removes water up to 1 quart per minute & filters particulate down to 10 micron
- 2 Oil coalescing filter removes oil aerosols down to .001 ppm & traps particulates down to .01 micron
- 3 Activated carbon filter removes oil vapor down to .003 ppm, removing odor & taste from the air
