Press Release

Tsunami Compressed Air Solutions, a division of Suburban Manufacturing, Inc., is proud to announce a partnership with Saylor-Beall. Through this partnership, Tsunami will offer to the marketplace a complete compressor and dryer package built into one integrated system.

Saylor-Beall a manufacturer of industrial grade air compressors for more than 90 years, built its reputation on quality and the proven ability to meet the special needs of their customers. They are known for industrial quality designs, prompt shipments and custom applications. Through an on-going program for continuous improvement, Saylor-Beall has developed better materials, designs and manufacturing processes. This has resulted in an outstanding line of quality air compressors that meets the needs of the most rugged applications.

Tsunami Compressed Air Solutions is a complete line of products designed and developed to assist customers in obtaining dry, clean air for their specific application needs. The systems use the latest technology to provide the cleanest, driest compressed air available. Use of the Tsunami products can help save 10%-15% of compressed air energy costs.
