

# Architectural PVC

The *Suburban Sidewinder Sleeve™* is a protection sleeve used for bundling and wrapping hoses and cables. The reusable sleeve features Mil-Spec extreme Hook & Loop closure which allows installation without disconnecting hoses and can reduce labor time by 70%. The sleeve is available in a variety of different material and can be customized in order to meet the needs of any application.

## Typical Applications

The *Architectural PVC Sleeve* is a tough and lightweight sleeve designed for outdoor application protection. This sleeve is commonly used for covering hose that is used on the ground, mud pumping for well drilling, and on remote construction tools. This product is not recommended for welding applications.
