

LUBEMINDER® Grease Bank System

**NEW FOR 2008 IS THE LUBE MINDER GREASE SYSTEM
ENJOY THE CONVENIENCE OF A NEW GREASE BANK SYSTEM.**

The *LubeMinder Grease Bank System*:

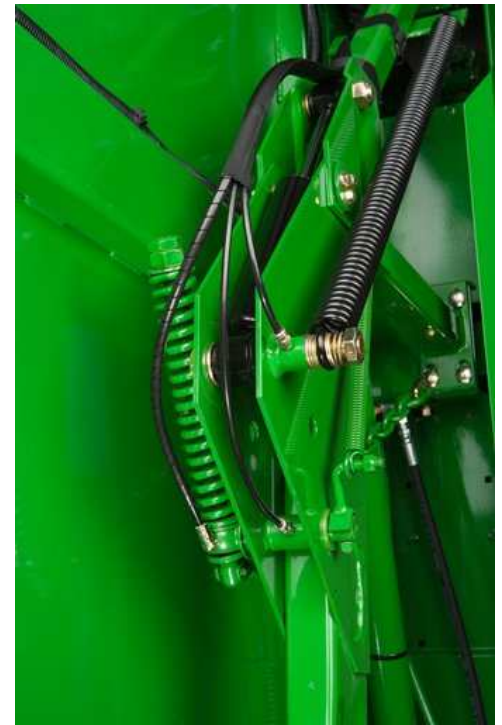

- Provides convenient location of grease points.
- The operator no longer needs to crawl around or under the machine to grease all the grease points.
- The system comes complete and ready to install.
- Maximize machine value at trade in time

Advantages of the *Lube Minder Grease Bank System*:

- Having proper lubrication will assure smoother operation and longer machine life of critical wear points.
- Grease lines are routed to 21 lubrication points on the machine.
- Simple; operator can use a standard grease gun

**The Lube Minder Grease System is complete and ready to
install on all Eight Series Balers.**

QUESTIONS & ANSWERS FOR THE NEW GREASE BANK SYSTEM OUR SYSTEMS WILL SAVE YOU TIME AND MONEY!

How does it Work?

- This system is so simple. All grease zerks are located in a convenient location, so you can grease all grease points in about 5 minutes. Each kit contains:
 - A. 2 Grease Banks for the front of every baler, each grease bank is mounted under the twine box
 - B. If the baler has a “Kicker Option”, there are 2 Grease Banks for the “Kicker”. These are mounted on back of baler.

Will this really save me time?

- You will save about 30 minutes every time you grease your baler.
- You will no longer have to find all the zerks on a baler because they are conveniently located.
- Ever had to get down on all fours to find the one behind the tire, or jump up on the tire to get the one up on top? Or, skip these zerks because they were too hard to reach?
- The number 1 reason for a broken part, “I did not know there was a zerk there”.

What type of grease should I use?

- Grease is cheap and old grease should be discarded.
- Your old grease actually becomes hard. Old grease loses the oil from the soap leaving a hard residue no longer having much of it’s lubricating capabilities and can solidify or blow lines
- So another question; Should I use my old Grease? The answer is No!
- You should use “Multi-Purpose Lithium Grease PT507 from John Deere
- Recommended shelf life is less than 1 year old!

Can I use a power Grease Gun?

- No, the pressure exerted by a power grease gun is too large!
- This pressure could burst the grease line. So, please use a manual grease gun and new grease.

How long will it take to install?

- 2 grease banks on the front of the baler will take about two hours.
- If your baler has the kicker option, you can add about 2 more hours of installation time.
- Total for Baler with a Kicker is about 4 hours to install.

Will this increase the life of my Baler?

- It helps keeping up with the required maintenance schedule which gives the baler it’s expected life.
