

RELIABLE HEAT WHERE IT COUNTS

FIXED TEMP DRUM HEATER

Sidewinder's Fixed Temp Drum Heater is designed to heat and maintain the temperature of the drum contents. This drum heater perfectly fits around a 55-gallon steel or plastic drum to ensure even heat distribution. Engineered with internal controls, no temperature settings are required for a simple plug-and-play user experience. This drum blanket features a strategically placed heating element that allows the user to securely fasten the drum to the rig wall, helping prevent it from tipping over.

The Sidewinder Drum Heater is made of a rugged poly-vinyl coated nylon outer shell, and high-density closed cell foam inner insulation to keep the cold out, and warmth in. A proprietary heating element is infused with a rugged foil, giving the blanket a sleek profile allowing for ease of install, roll up and storage. The blanket has buckles to secure the heater to the drum when in use, and a buckle to keep it from unrolling when in storage.

THERMAL RETENTION

High density polyethylene foam keeps the warmth in, and a proprietary coated nylon keeps the cold out, heating up to 80°F or 100°F.

EASY INSTALL

Tightening snap buckles make for an easy and sturdy install.

OPTIMIZED FOR OPERATION

The preset controls offers a simple plug-and-play experience - no need to worry about temperature settings.

LIGHTWEIGHT

Sidewinder features a proven combination of insulation with a proprietary cover to remain extremely lightweight, flexible and compact.

Features & Benefits:

- Lightweight; easy to install & store
- Preset temperature control: 80°F or 100°F
- Buckle closure for a snug drum fit

PRODUCT SPECS

Description: Insulated Blanket with Heating Element

Closure: Buckles that Tighten

Coating: PVC

Temperature Range: 80°F or 100°F (60°C)

Power: 120V / 700W / 5.8 Amps

For easy storage, roll up the Sidewinder Fixed Temp Drum Heater and secure it with the integrated buckle. This efficient wrap-up method keeps the cover neatly contained and protected until its next use.

3-STEP INSTALL

- 1 Unbuckle, unroll, and wrap heater around barrel.
- 2 Clip and tighten snap buckles on the barrel.
- 3 Plug drum heater into nearest outlet - and you're all set.
