

COMPRESSED AIR DONE RIGHT

TSUNAMI COMPRESSED AIR SOLUTIONS DELIVERS CLEAN, DRY, RELIABLE AIR BACKED BY FOUR DECADES OF EXPERIENCE AND REAL-WORLD APPLICATION KNOWLEDGE.

THE TSUNAMI ADVANTAGE

Compressed air isn't one-size-fits-all. Every environment, application, and industry has different requirements, and getting it wrong leads to downtime, poor performance, and higher costs.

Tsunami takes a system-level approach. We don't just provide components, we design solutions based on how your air is used, the conditions you operate in, and the performance you need.

From high heat and humidity to sensitive finishing applications, we engineer systems that deliver clean, dry, reliable air where it matters most.

WHAT SETS US APART:

✓ HIGHER QUALITY, LONGER LIFE

Experience a higher quality product that cleans the air and lasts longer than cheaper filters.

✓ HASSLE-FREE SERVICING

Built to service quickly and efficiently to increase productivity and decrease downtime.

✓ VERSATILE

Our technology is easy to mount, install, and operate so you can place it wherever your operations require.

ENGINEERED FILTRATION SYSTEMS

DESIGNED FOR REAL-WORLD PERFORMANCE

WHY TSUNAMI FILTERS?

Tsunami filtration systems are built for durability, performance, and ease of use in real-world environments.

- Machined from 6061 aircraft-grade aluminum for strength and longevity
- Minimal maintenance with easy-to-service float drains
- Designed for systems ranging from 20 to 800 CFM
- Made in the USA for quality you can trust

Built to perform consistently with less downtime and less maintenance.

WHY TSUNAMI DRYERS?

Tsunami dryers are engineered to deliver reliable, ultra-dry air for demanding applications.

- Ultra-low dew points down to -80°F
- Low relative humidity levels down to 0.01% RH
- Expandable drying technology to grow with your system
- Oversized 2-stage pre-filtration for optimal performance and future expansion

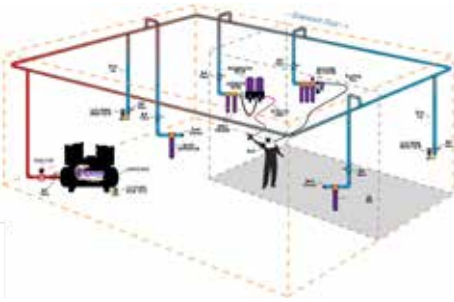

Designed for consistent performance in high-demand and variable environments.

THE TSUNAMI DIFFERENCE

- Tsunami systems are designed with the full compressed air process in mind, not just individual components.
- From filtration to drying and point-of-use performance, each system is built to work together to deliver clean, dry air where it matters most.
- Our modular approach allows you to scale and adapt your system based on your application, environment, and air demand.

WHAT WE DELIVER

- **Consistent Air Quality**
Reliable removal of moisture, oil, and contaminants
- **Improved System Efficiency**
Reduce energy waste and maintain performance
- **Reduced Downtime**
Durable, low-maintenance systems built to last
- **Application-Specific Performance**
Solutions tailored to your environment and use case

APPLICATIONS/INDUSTRIES

- Industrial Manufacturing
- Spray Foam & Mobile Operations
- Finishing & Coating Applications
- Automation and Metrology Industries
- Marine & Harsh Environments
- Oil and Gas Applications
- Food and Beverage
- Woodworking
